The Managing Director
Jaipur/Ajmer/Jodhpur Vidyut Vitran Nigam Ltd.,
Jaipur/Ajmer/Jodhpur

Sub:-Tightening of loose wires and repair of tilted poles on rural 11KV feeders under the feeder maintenance programme.

It is felt that loose wires and tilted poles are increasingly becoming the cause of fetal accidents in rural areas and also contributing to the increased number of trippings consequent to line faults. Although, we have covered the repair of loose line and tilted poles under feeder maintenance programme but it may be advisable to do this work on priority and remaining work under feeder maintenance programme can be taken up separately. It is, therefore, directed that tightening of loose wires, repair of tilted poles and providing of intermittent poles be taken up separately by employing the workmen in each sub division in sufficient numbers on muster roll so that the work is taken up in hand within next one week and is completed on war footing thereafter. The progress of this work will be monitored by Sh. T.S.Sharma,SE(MIS), JVVNL, Jaipur who will obtain the daily progress and status of work as per these directions.
