OFFICE ORDER — 24

Sub:- Preventive measures to avoid catch fire incidents in circle stores/sub-stores.

During last days, catch fire incidents have been reported by the Assistant Controller of Stores, Dausa and Jaipur. Earlier under these circumstances, preventive measures to be taken up were suggested vide this office letter No.39 dated: 10.04.2015 and 705 dated: 12.09.2014. It seems that these orders were/are not followed strictly.

Looking to the hot summer and dusty storms these days, it is essential to remain alert/attentive and all out efforts should be ensured to avoid the catch fire incidents in stores premises. Matter has already been initiated at higher level also to provide same kind of permanent system which may effectively work in extinguishing catch fire incidents taken place in stores premises.

However, you are again advised to ensure the following measures to minimize /check the possibilities of catch fire incidents in stores premises:-

1. Dry leafs, paper cartoons/packing materials spreading here and there in zigzag manner and other garbage should be placed away /removed far away from stores premises.
2. Equipments/materials which can easily catch fire, should not be placed below the live electric lines if passing through the stores. For example, transformer oil transformer cable drums, CP PT sets etc. are highly

inflammable. Therefore such items should not be placed below the live electric lines. Also, removal of such lines should be ensured

3. Fire fighting equipments may be maintained in proper working condition.
4. Water drums/cement water tanks filled with water may be kept at different places along with buckets/rubber pipes. Security guards/our staff should also be trained to take initial steps so as to avoid mishappenings.
5. Keep the important contact telephone numbers displayed in chowkidar hut and notice board of office.
6. Burning of garbage/wastes nearby stores premises requires to be watched regularly.
7. Continuous round of security guards in wards should be ensured in effective manner so that the catch fire incidents if any be attended readily.

Besides above, all other possible precautionary measures which are needed/suits to meet your store requirement also be taken. Please note that if incidence of fire occurs in stores (premises) under your control, you shall be responsible for any adverse consequences.

(K.G. Kanwat)
Superintending Engineer(I&S)
